

Philosophy 2330
Spring 2018
Study Guide for Exam 2

The second exam takes place during the time of our scheduled final exam: in-class in our standard room Friday, May 11th from 7:30am-9:50am. The exam will cover all of the material that we have discussed in class and in the assigned readings since the first exam.

You should know the main theses and main arguments for those theses of each of the book chapters we have read so far.

You should also know what each of the following terms means and how they are relevant to the class. This is not an exhaustive list.

Social Darwinism

Eugenics

The naturalistic fallacy

Hume's Thesis (and the fact/value distinction or the is/ought gap)

The prisoner's dilemma

Tit-for-Tat

Biological Altruism

Group Selection

Kin selection

Reciprocal altruism

Evolutionary Psychology

The EEA – Environment of evolutionary adaptation

Heritability

Norm of reaction

Consilience

Reductionism
